

AGENDA
Parks, Trails, & Open Space Steering Committee: Meeting #3

6:00	Review Previous Engagement Efforts
6:05	Review Special Feature Park Concepts (7 parks, 5 minutes per par
6:40	Review Community Park Concepts (8 parks ,5 minutes per park)
7:10	Review Community Park Concepts (14 parks, 3 minutes per park)
7:30	5 minute break
7:35	Review Remaining Neighborhood Park Concepts
7:52	Review Linear Park Concepts (9 parks, 1 minute per park)
8:01	Review Overall Park System Plan
8:00	Adjourn

## Meeting #1 Goals

Review concepts for every park in the system

✓ Build consensus for direction of park concepts

Review overall park system plan

## **Updated Park Profiles**

#### NORTH ALEXANDER PARK

LOCATION 1810 and Avenue NOV SIZE : 1311 MIN CLASSIFICATION : Community FakePuylek REC CENTER : No. SCHOOL CONNECTIONS: None CURRENT PROJECTS: None

North Akkander Patis a premier, destination athletic cark in Facilitatis. Located north of the Carpon River Reservor, the park is advised to and have view or the highest facilitation with the patients of Family Assaultic Center and River Country Family located the rooth sale of the park side. This park index manner of the Clip's shallow for annexis. It also has the largest offly area in Faulbaut.

#### CURRENT CONDITIONS AND CONCERNS

This post is well more trained and is generally in good condition. The filtering and full least is imaged condition and operational to the community. The play size is also in good condition and has been agree assessment of the grown that the play size is also in good condition and has been agree assessment to get instance. They share a bornisher. The good are after upon the play size after upon the good and good and

# **Bullseye Activity**

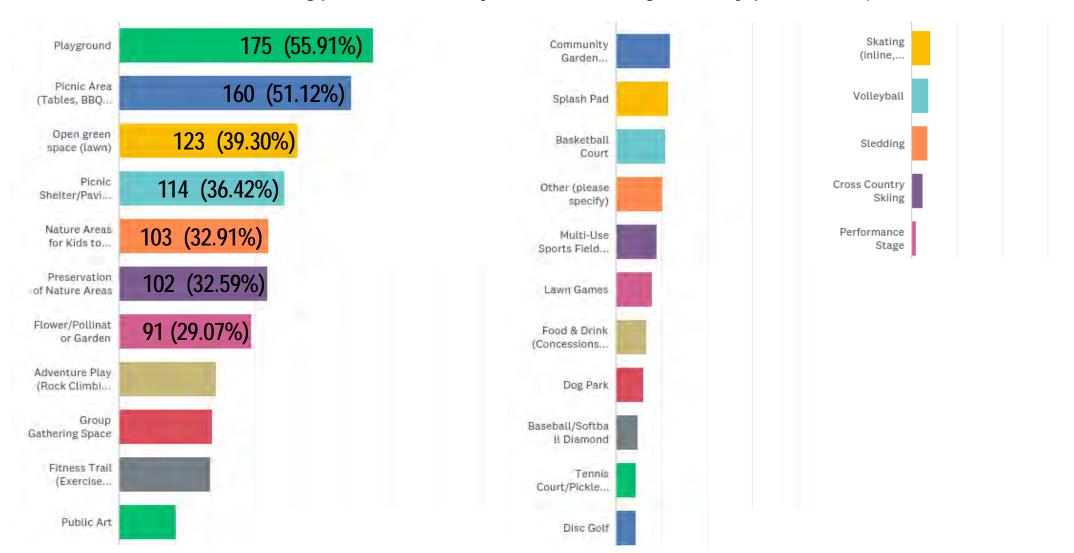

## **Bullseye Activity**

- park):
  - a. Walking Trail
  - b. Picnic Area
  - c. Nature Play
  - Gathering Space
  - e. Playground
- 2. Tier 2 (park elements that belong in 50% of the parks):
  - a. Green Space
  - Pollinator Garden
  - Basketball Court
  - d. Public Art
  - Fitness Trail

- 1. Tier 1 (park elements that belong in every 3. Tier 3 (park elements that belong in 10% of the parks):
  - a. River Access/Kayaking
  - b. Fully Accessible Playground
  - c. Ice Skating
  - d. Skate Park
  - e. Splash Pad

Q1: As part of the Journey to 2040, we are updating the parks, trails and open space plan. When thinking about the future of parks in Faribault, which of the following park facilities do you think should go in every park? Pick up to five facilities.

Q1: As part of the Journey to 2040, we are updating the parks, trails and open space plan. When thinking about the future of parks in Faribault, which of the following park facilities do you think should go in every park? Pick up to five facilities.

OTHER (FEE	EASE SPECIFY)
Bench or oth	er seating
Less lawn. M	fore natural areas
Roof over pic	cnic tables with 2++ bbq grill
Restrooms	
Drinking four	ntains!
Fire pit	
Restrooms	
More bike pa	ıths
a special des the ideas liste more multifue adults. One d	se things are cost prohibitive or illogical to be at every park. I think Faribault can create stination within each park, and have some amenities that are at every park. Some of ed are a little redundant and could be combined better. Marketing the spaces to be nctional. Every park should have spaces designed to attract children, adolescents and could have a nature area for kids to play, which includes a wildflower garden, while a playground. One may have a green space that can be used for yoga, soccer,
At least one	sport - volleyball, tennis, skating, etc.
Three stream	n waste disposal (landfill/recycling/compost)
Functional R	est room
Campsites	
	for running, biking, and roller blading that connect it with other parks/green spaces to er trail system
Water Founta	ains
Restrooms	
Restrooms	
More enviror	nmental space dedicated for natural environmental interface
facilities - wa	ster/bathroom
Trail connect	ting it to other trails and parks.

wheelchair swings for the handicaped !!

Love the ideas of volleyball, baseball, basketball, splash pad, performance stage, etc but not at every park, perhaps put something unique from that list at each park so each park has its own twist. I prefer keeping the parks natural. River bend does a great job with that!!!

Trail connecting every park to all other parks.

Not every park...

More trees with more diverse species.

Ponds with stocked fish (Catch and release only).

Dual swing for adult and child together.

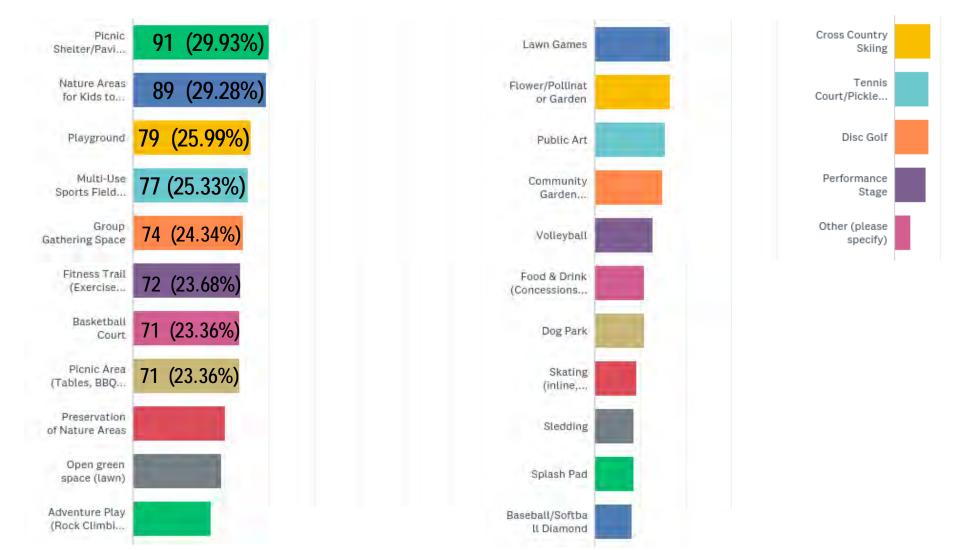

Water fountains.

Connection to bike trails.

Bathroom.

Q2: When thinking about the future of parks in Faribault, which of the following park facilities do you think should go in 50% of the parks? Pick up to five facilities.

Q2: When thinking about the future of parks in Faribault, which of the following park facilities do you think should go in 50% of the parks? Pick up to five facilities.

OTHER (PLEASE SPECIFY)
Bench or seating other than picnic table
Pickleball courts painted on basketball courts
Restroom
Volleyball
Disc golf
water/bathroom facilities
wheelchair swings
More trees
Basketball hoops
Handicap accessible playground equipment
Splash Pad

Q3: When thinking about the future of parks in Faribault, which of the following park facilities do you think should go in 10% of the parks? Pick up to five facilities.

Q3: When thinking about the future of parks in Faribault, which of the following park facilities do you think should go in 10% of the parks? Pick up to five facilities.

OTHER (PLEASE SPECIFY)	
Pickleball courts	
Single track mountain bike trails	
Outdoor climbing wall etc.	
I think all of these ideas should be incorporated into Faribault's parks somehow. Survey monkey only allows 5 choices for each question. I think each park needs to have community sponsored activities throughout the year to bring people together outdoors more.	
Maybe I missed it, but how many parks are we talking about in total? It's difficult to make a fiscally responsible/feasible answer with not knowing that info.	
No others	
Not sure	
wheelchair swings	
More trees	

### **Preliminary Design Principles**

### A set of guidelines/principles to be applied to the system-wide plan:

- 1. Diversification of park facilities
- 2. Improved connectivity within the park and trail systems
- 3. Accessibility for all
  - Multi-generational activities throughout the City
  - ADA compliant facilities
- 4. Gathering spaces
- 5. Connection to the natural spaces and activate the river where possible
- 6. Sustainable approach
  - Ability to respond to events in the community

### **Concept Review**

- 1. The concepts are "high level" and will be refined at the next round
- 2. You are going to have to make a lot of *FAST* decisions
  - a) We are here to get consensus
  - b) We will take a vote if needed
  - c) Be respectful of all opinions
- 3. Your worksheet is to help you follow along you can provide additional written feedback after the meeting
- 4. The public will have an opportunity to provide feedback
